Education

Northeastern University, Khoury College of Computer Science

Boston, MA

Candidate for Bachelor of Science in Computer Science and Design, Minor in Marketing

Expected: May 2028

Honors: GPA: 3.75/4.0 | Dean's List

Relevant Coursework: Introduction to Marketing, Experience Design Principles, Information Design Principles, Typographic Systems, Design Principles, Foundations of Data Science, Object Oriented Design, Designing Interactive Experiences

Technical Skills

Languages: Proficient: Python, Java | Familiar: HTML, CSS, React, NodeJS, SQL

Software: Figma, InDesign, Photoshop, Illustrator, Git, Visual Studio Code

Experience

Code4Community - Boston, MA

May 2025 - Present

Design Lead

January 2026 - Present

- Direct design execution by managing workflow planning, writing design tickets, and delegating tasks to designers
- Oversee development and expansion of the organization's design system to ensure scalability and consistency
- Partner with developers and stakeholders to align product strategy with user needs and accessibility standards

Product Designer

May 2025 - January 2026

- Designed wireframes and high-fidelity prototypes in Figma to improve usability and accessibility across projects
- Built a design system from scratch to maintain visual consistency and streamline collaboration with developers
- Collaborated with clients to gather feedback and iterate on solutions based on stakeholder and user needs

TedxNortheasternU - Boston, MA

January 2026 - Present

Software Developer

- Maintain and improve website functionality by updating React front end components and Sanity CMS content
- Ensure accuracy of event information while maintaining a consistent and accessible user experience across web pages

FirstByte - Boston MA

January 2026 - Present

Branding and Marketing Team Member

- Designed and published social media content for Instagram and LinkedIn to increase brand awareness and engagement
- Created marketing graphics and promotional assets using Canva to support outreach campaigns
- Contributed to visual branding consistency across digital platforms

Novo Nordisk IT (NNIT) - Princeton, NJ

June 2023 - August 2023

Intern

- Developed a Python-based automation tool to streamline data migration, reducing manual errors and improving transfer efficiency
 - Delivered a live demonstration to technical stakeholders, highlighting the tool's practical value and impact
-

Projects

Blue Horizon Project: Designer | Figma

May 2025 - June 2025

- Designed an interactive installation concept that visualizes sea-level rise along Boston's Esplanade to make climate change more tangible
- Created a Figma prototype for three time-based experiences (1-year, 10-year, 100-year), translating research into user flows
- Designed supporting visual assets (logo, poster, installation sketches) to ensure cohesive project branding and engagement

Evently: Designer and Developer | React, NodeJS, Git

January 2025 - April 2025

- Built a campus event discovery web app enabling students to browse, RSVP to, and track university events
 - Designed and implemented a swipe-based event matching interface to streamline event selection and improve user engagement
 - Developed full-stack functionality integrating frontend UI components with backend event and RSVP data handling
 - Collaborated using Git version control to manage feature development and iterative improvements
-
